## SUMMARY

Full Stack Developer skilled in React, Python, MongoDB, and SQL. Experienced in building scalable web applications and integrating blockchain technologies and machine learning. Active in technical communities, with experience in event leadership and software project collaboration. Currently learning AI System Security and Linux OS.

## SKILLS

**Programming Languages:** C, Python, JavaScript, SQL
**Frontend & Backend:** React, React Native, Node.js, HTML, CSS ,REST API
**Databases:** MongoDB, MySQL
**Tools & Technologies:** Git, GitHub, Postman, Swagger
**Languages:** English, Hindi, Malayalam

## INTERNSHIPS

**React Developer Intern** – *Ofside, Delhi* **May 2026 – Aug 2026**

- Team Size: 2 developers
- Technologies: React Native, NestJS, Node.js, REST APIs.
- Project: Contributed to a sports management platform featuring match scoring, tournament management, authentication, and subscription functionality.
- Contributions: Debugged and resolved 250+ application issues. The application was released on both the Google Play Store and Apple App Store.

**Digital Marketing Intern** – *Mindenious, Bangalore* **May 2025 – June 2025**

- Contributions: Designed promotional posters, marketing materials, and webinar content to improve audience engagement.
- Coordination: Handled student enquiries, coordinated meetings, and resolved queries related to programs and events.

## PROJECTS

**Concordia – Blockchain Collaboration Platform** **July 2024 – Sep 2024**

- Built a collaborative platform for goal tracking, team coordination, and shared fund management.
- Integrated smart contract transactions on the opBNB Testnet using MetaMask wallet connectivity.
- Recognized during the BNB Hack and collaborated with developers on blockchain-based solutions.

**PA System – Voice Announcement Classifier** **Oct 2025 – Nov 2025**

- Developed a real-time voice announcement classification system for emergency alerts and public announcements.
- Implemented speech recognition using WhisperX and deployed the solution through Linux hotspot and captive portal infrastructure.
- Designed the system for large organizations and institutions to communicate important announcements efficiently in noisy environments.

**Emotion & Relationship Classification System** **Sep 2025 – Feb 2026**

- Developed a system to classify human emotions and identify relationship patterns from conversations.
- Utilized BERT-based NLP models and MySQL for emotion analysis and data storage.
- Improved prediction accuracy through data preprocessing and multimodal text analysis techniques.

## EDUCATION

**B.Tech in Computer Science & Engineering** **2023 – 2027**
Christ College of Engineering, Thrissur, Kerala
CGPA: **72.30%**

**Higher Secondary Education (Class XII)** **2020 – 2022**
Bharatiya Vidya Bhavan's Vidya Mandir, Thrissur, Kerala
Percentage: **87.6%**
